

## Shady Grove “grove” Wireless Network Setup Instructions

This document provides a step-by-step procedure to connect to Shady Grove’s public wireless network with a Windows PC.

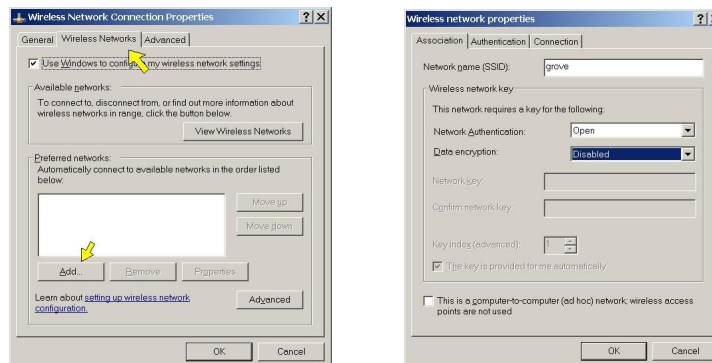

1. Access the Control Panel by selecting: **Start>Settings>Control Panel.**
2. Double-click on the “Network Connections” icon in the Control Panel window.

3. Right-click on the “Wireless Network Connection” and select “properties” from the drop-down menu.

4. Select the “Wireless Networks” tab in the “Wireless Network Connections Properties” window.
5. Make sure the “Use Windows to configure my wireless network settings” is checked and Click the “Add” button.
6. Enter the Following Settings in the “Wireless Network Properties” window.
  - a. Network Name (SSID) : **grove**
  - b. Network Authentication: **Open**
  - c. Data Encryption: **Disabled**

7. Click “OK” on the Wireless Network Properties” window.
8. Click “OK” on the “Wireless Network Connection Properties” window.
9. Open your preferred Internet Browser. It will re-direct your home page to a secure splash page. Enter username “**grove**” and password “**unsecure**” to complete your association to Shady Grove’s public wireless network.
