I-1.01 Acceptable Use Policy

The Universities at Shady Grove is hereinafter referred to as "USG" and the Office of Information Technology as “OIT.”

1.0 Purpose

The purpose of this policy is to ensure the appropriate use of USG campus IT resources while protecting the sharing of information, the right to privacy, freedom of expression, intellectual property, and security of information.

2.0 Scope

The scope of this policy includes any and all use of USG IT resources including, but not limited to, computer systems and devices, software and application services, email and electronic messaging, the campus network, and the USG Internet connection. This applies to all populations including, but not limited to, students, staff, faculty, contractors, vendors, and all campus visitors/guests.

3.0 Policy

Those using USG IT resources, whether on campus or elsewhere, are responsible for complying with security standards set forth by the Director of OIT and USG Senior Leadership, safeguarding identification codes and passwords, and for using them solely for their intended purposes. Individuals are solely responsible for their personal use of IT resources and are prohibited from representing or implying that statements related to such use constitute the views or policies of USG.

The maintenance, operation, and security of IT resources require responsible USG personnel to monitor and access systems and networks. To the extent possible in the electronic environment and in a public setting, a user’s privacy will be preserved. Nevertheless, that privacy is subject to applicable federal and state law, including the Maryland Public Information Act, and the needs of USG to meet its administrative, business, and legal obligations.

Prohibited Conduct

The following provisions describe conduct prohibited under this policy:

1. Altering system software or hardware configurations without authorization; disrupting or interfering with the delivery or administration of IT resources.
2. Attempting to access or accessing another's accounts, private files, e-mail messages, or

Public

intercepting network communication without the owner's permission except as appropriate to your job duties and in accordance with USG’s legitimate purposes.

3. Misrepresenting oneself as another individual in electronic communication.

4. Installing, copying, distributing, or using digital content (including software, music, text, images, and video) in violation of copyright and/or software agreements or applicable federal and state law.

5. Engaging in conduct that interferes with others’ use of shared IT resources.

6. Using USG IT resources for commercial or profitmaking purposes or to represent the interests of groups unaffiliated with USG or unassociated with the normal professional activities of faculty, staff or students without written authorization from USG.

7. Ignoring individual departmental or unit lab and system policies, procedures, and protocols.

8. Facilitating access to USG IT resources by unauthorized users.

9. Exposing sensitive or confidential information or disclosing any electronic information that one does not have the authority to disclose.

10. Knowingly using IT resources for illegal activities. Criminal or illegal use may include obscenity, child pornography, threats, harassment, copyright infringement, USG trademark infringement, defamation, theft, identity theft, and unauthorized access.

4.0 Enforcement

The enforcement of this policy will be carried out by authorized USG OIT personnel designated by the Director of OIT and USG Senior Leadership. Violations may result in disciplinary actions, which may include suspension, restriction, or revocation of access. Where illegal activities or theft of USG property (physical or intellectual) are suspected, USG may report such activities to the state/federal law enforcement authorities.

5.0 Definitions & Terms

Device – Any portable or fixed computational machine with the capabilities of transmitting and/or receiving data over a wired or wireless network.
