Calling all Healthcare Superstars! Applied Software Inc. also known as MagView (http://www.magview.com) is a growing proprietary health software company that has a 27-year stable track record of growth in the niche healthcare market. We deliver quality software solutions to hospitals and breast centers across the nation that helps save lives. We have a dynamic & diverse team of talented individuals that strive for excellence and love to help each other and our customer’s. The ideal candidate we are looking for will enjoy the challenge of working on multiple projects in a fast-paced environment, working with senior staff, and providing field oversight on a variety of projects. This position will require some travel to implement our software. An ideal candidate must be willing to travel up to 25% of the time as needed and willing to learn all about our proprietary software solutions. We will train the right individual for success in this position so please apply if you are a self-starter and motivated individual. We have many growth opportunities within our organization for the right person. Come join a dynamic team where the possibilities are based on your effort. Our software helps saves lives every day at the largest most prominent hospital organizations across the nation!

The Role
The Healthcare Implementation Specialist (IS) is responsible for providing basic to moderate range of project coordination from initial planning through any software development requests and all implementation processes. The right person for this position exhibits leadership qualities that enable them to manage small & large multi-functional and geographically distributed teams. The IS/Coordinator manages the high-level business objectives for the project and is “hands-on” with assessing requirements, end-user testing, client delivery, and the software development life cycle. While assisting with the implementation, the IS will lead the design of project plans, fine-tune clinical workflow, and help to create world-class software products and solutions for our customers. These innovative technology solutions make our customers’ lives easier and ensure that no patient falls through the cracks. The ideal candidate would have a passion for healthcare and enjoy working on multiple projects in a fast-paced environment. This position will be integral to program management and ensure solutions to meet customer business requirements. This includes tracking program functionality, schedules, and performance across the business and product lines. This position will work and learn alongside the implementation manager and senior team to lead internal & external staff activities for services related to assigned projects. The IS provides best practices, regional & national standards, workflow procedures, and other tools and templates for successful solution delivery. This is an entry-level position that requires excellent customer service and outstanding written & oral communication skills. A successful candidate will be working closely with senior staff in a variety of healthcare organizations across the nation, providing field oversight on a variety of projects. The ability to lead combined teams with clients, strategic vendors, and MagView personnel and the ability to report to executive management is a must. As this is an entry-level position, we will train the right individual to be successful in our 4-week training program and project ramp-up course. This strategic position collaborates routinely with MagView management/staff with expertise in software development, quality assurance, account management, client services, finance, marketing, sales, commercial business partners, and subject matter experts from various industries. The individual in this role needs to be self-driven and have a passion for understanding how to solve problems efficiently with our health software technology solutions.
We are looking for individuals that can quickly learn the radiology domain and become subject matter experts on our proprietary software products.

Responsibilities
Develop a keen knowledge of the healthcare industry to best serve our customers
Drive achievement of projects/program success factors
Drive project execution. Provide direction and oversight throughout the project lifecycle to meet applicable business requirements
Engage appropriate stakeholders in risk identification and mitigation
Act as an internal advocate for the project
Coordinate, document, and communicate project plans and requirements
Accountable for understanding business objectives and how the projects/program deliver them;
  driving adjustments in projects/program to more effectively achieve desired business results
Ability to adapt and respond to changes both inside and outside the projects/program
Ability to predict risk areas, design mitigation/contingency strategies and execute on these strategies to avoid issues

Desired Qualifications
Education: College degree
Healthcare or business background desired
1-2 years of directly related project management/healthcare coordination experience* desired, but not required we will train the right individuals!
Good written/verbal communication and facilitation skills for communicating at all levels;
  including strong presentation skills
Good consultative, customer focus & service skills
Intermediate knowledge of Microsoft applications (Word, Excel, Visio, Project, PowerPoint)
