

Deployment Specialist / Associate Developer

SkillSmart

Germantown - MD (United States)

SkillSmart is seeking a Deployment Specialist to be an integral part our client success and product development team. You will have the opportunity work in a fast-paced environment that empowers critical thinking and collaboration across departments. You will be the link between the testing and delivery of our product to our new clients and will be a critical point of communication for the entire organization.

You will be responsible for managing the deployment process for new clients to include learning our current products, processes, configurations and client sites and automating our build and deployment cycles to improve upon that process. This will involve managing the configuration of deployed sites on AWS while documenting and managing new deployments. You will use your knowledge of MongoDB to troubleshoot and optimize any issues that arise during this process.

In addition, you will also play a vital role in supplementing our QA process by participating in regression and new feature testing as well as document and automate testing infrastructure that is run prior to deployments. In addition, because of your knowledge of the client and their use of the product, you will also participate in code enhancements of production releases to improve their product utilization.

Basic Qualifications:

- Strong working knowledge of AWS
- Working knowledge of MongoDB
- Working knowledge of C#/.NET preferred
- Experience with React and Typescript desired
- Experience with software QA / testing, with test automation skills preferred
- Strong verbal and written communications skills
- Demonstrated ability to work effectively as part of a team both in person and remotely
- Work independently to prioritize and manage tasks
- Demonstrated ability to work effectively with clients

A typical day at SkillSmart is anything but typical – we have a flexible and open work environment where we can easily collaborate and support each other to create solutions for our clients OR you may be off-site working with a client as a part of their team helping to build out solutions. Everyone is engaging on projects that are having direct impact on our mission. We have a casual dress code because it allows to keep our focus on what's most important – improving outcomes.

We seek to attract talent that can work smarter as part of the team because we encourage you to take the time to live your passions in and out of the office. There is nothing that “we’ve always done that way” because we are always seeking to improve what we do and how we do it.

Compensation & Benefits

- Health, Vision, and Dental Benefits
- Stock Options
- Competitive salary and bonus structures
- PTO and Paid Family Leave
