Shady Grove “grove” Wireless Network Setup Instructions

This document provides a step-by-step procedure to connect to Shady Grove’s public wireless network with a Windows PC.

1. Access the Control Panel by selecting: Start>Settings>Control Panel.

2. Double-click on the “Network Connections” icon in the Control Panel window.

3. Right-click on the “Wireless Network Connection” and select “properties” from the drop-down menu.

5. Make sure the “Use Windows to configure my wireless network settings” is checked and Click the “Add” button.

   a. Network Name (SSID): grove
   b. Network Authentication: Open
   c. Data Encryption: Disabled

7. Click “OK” on the Wireless Network Properties” window.

8. Click “OK” on the “Wireless Network Connection Properties” window.

9. Open your preferred Internet Browser. It will re-direct your home page to a secure splash page. Enter username “grove” and password “unsecure” to complete your association to Shady Grove’s public wireless network.
