Information Technology Internship - Helpdesk/Sysadmin/Web Development
University of Maryland - Institute for Bioscience and Biotechnology Research (IBBR)
Rockville - MD (United States)
Internship

IBBR is located in Rockville near the Universities at Shady Grove.

The Institute for Bioscience and Biotechnology Research is looking for part-time student employees for a wide range of IT activities. While all student positions will help with the helpdesk and A/V needs, you will also have projects in web development, Linux and Windows server management, virtual server environments, devops, and occasionally networking. IBBR maintains a medium sized high performance computing cluster, ~1 PB of storage, and supports around 20 software projects on our intranet.

Qualifications
Requirements:
- The ability to discover what you don't know and ask questions
- Engineering mindset i.e. the need to find not just any solution but the 'right' solution
- Fairly strong basic computer troubleshooting skills in Windows
- 10-20 hours/week availability (but schedule is very flexible around school)
- The ability to work independently and self teach
- For web development work experience with Linux, PHP, Drupal, Javascript, HTML, CSS helpful

To apply, please send your resume to An Ngo at ngoa@umd.edu.
